MEMORIA TOPOGRÁFICA DE LOS TRABAJOS REALIZADOS
PARA LA REDACCIÓN DEL PROYECTO DE CARRIL BICI EN LA
ZONA DE LA CIUDAD DE LA INNOVACIÓN.

1. OBJETO

El objeto del trabajo es la elaboración de la cartografía de detalle para la Redacción del proyecto de carril bici en la zona de la Ciudad de la Innovación.

Todo el trabajo topográfico se ha apoyado y enlazado en la Red de Geodesia Activa de Navarra (RGAN) para planimetría y en el modelo de geoide EGM08-REDNAP para altimetría. Se ha utilizado para el cálculo de los puntos tomados el sistema de referencia European Terrestrial Reference System 1989 (ETRS89).

2. MÉTODO DE OBSERVACIÓN Y CÁLCULO

Para obtener las coordenadas de los puntos, hemos utilizado técnicas GPS EN TIEMPO REAL con un receptor GPS SETTOP AL-102 con conexión a Internet a partir de la RED DE GEODESIA ACTIVA de Navarra, utilizando la solución de RED. Este servicio permite conseguir un posicionamiento preciso en el mismo instante en que se realiza la medición con precisión centimétrica en tiempo real. En las zonas donde no se ha podido utilizar el GPS, se han tomado los puntos con una Estación Total AGA de la serie Geodimeter 620 con un error en lectura angular de + 2 seg. cent. y un error en distanciometría de 3 mm. \pm 5 PPM. Después de tomar los datos y calcular sus coordenadas se ha digitalizado el dibujo con AutoCad, obteniendo la topografía del terreno existente y el modelo digital del terreno en 3D.

COORDENADAS DEL LEVANTAMIENTO TOPOGRÁFICO

1	613575.79	4742307.80	422.97
